

Portable Evaporative Air Cooler

This portable evaporative air cooler is designed for personal or small space cooling. It uses evaporative cooling technology to lower the air temperature, making it an energy-efficient alternative to traditional air conditioning in dry climates.

Product Overview

Efficient Portable Cooling

This portable evaporative air cooler is an ideal solution for localized cooling in homes, offices, or workshops. By utilizing advanced evaporative cooling technology, it effectively lowers air temperatures in dry climates, offering an energy-efficient alternative to traditional air conditioning. Designed for mobility, the unit features integrated casters, allowing users to easily move it between spaces as needed.

Design & Mobility

Design Elements

- Front grill with horizontal louvers
- Top-mounted control panel
- Integrated water tank

Mobility Features

Casters, Portable, Compact Design
