

# Portable Evaporative Air Cooler

This portable air cooler provides efficient and portable cooling for household use. It features a multi-speed fan, a water tank for evaporative cooling, and directional louvers to distribute cool air evenly.

## Overview

### Efficient Portable Cooling

The KLP-B036 air cooler provides efficient and portable cooling for household use. It features a multi-speed fan, a water tank for evaporative cooling, and directional louvers to distribute cool air evenly. The unit is designed for ease of use with intuitive controls and a compact footprint, making it a versatile solution for various home environments.

## Key Features

### User Interface

- Multi-speed fan control
- Visible water level indicator
- Intuitive control panel

### Cooling System

Evaporative cooling • Directional louvers

### Mobility & Design

Caster wheels, Compact footprint, Portable design
