

Portable Evaporative Air Cooler and Heater with Remote

This portable unit provides both air cooling and heating. It has adjustable fan speeds and temperature settings, a water tank for evaporative cooling, and includes a remote control.

Product Overview

Versatile Climate Control

This portable air cooler and heater offers a comprehensive solution for year-round climate control. It combines evaporative cooling and humidification with powerful heating capabilities, making it suitable for various indoor environments. Designed for efficiency, it utilizes a cross-flow wind system for large air delivery while effectively filtering dust and odors.

Performance

Heating Settings

1000 W
Low Heat

2000 W
High Heat

Features

Core Functionalities

- Evaporative cooling
- Water-sprayed humidification
- Dust and odor collection
- Remote control operation
- Portable design with caster wheels
- Visible water level indicator

Environmental Impact

Environmental Credentials

Fluorine-free, Water-cooling technology
