

Portable Evaporative Air Cooler with 12L Tank

This portable air cooler features a 12L water tank for enhanced cooling performance. It operates at 75W (cooler) or 1000/2000W (heater) and produces a noise level below 48dBa.

Overview

Versatile 4-in-1 Climate Control

This portable unit offers a comprehensive 4-in-1 solution, functioning as an air cooler, heater, air purifier, and humidifier to ensure year-round comfort. Featuring a 12L water tank and a high-efficiency water curtain circulation system, it delivers effective cooling, while the integrated PTC heating element provides safe, rapid heating with dual power settings. Designed for convenience, it includes an ionizer for air purification, remote control operation, and smooth-rolling casters for easy mobility.

Technical Specifications

Power Consumption

75 W

Cooling Power

2000 W

Max Heating Power

Airflow Performance

800 m³/hr

Max Air Flow

6 m/s

Max Wind Speed

Rated Voltage

220V-240V/50Hz

Noise Level

48 dBa

Features

Control & Interface

- Remote Control
- Panel Control
- LED Display
- 7-Hour Timer

Advanced Features

Negative Ion Generator • Anti-bacterial Tank • Water Curtain Circulation • Automatic Left-Right Swing

Core Functions

Air Cooler, Heater, Air Purifier, Humidifier

Design & Build

Physical Specifications

Attribute	Detail
Water Tank Capacity	12L
Body Color	White
Materials	ABS, PC, PA66
Mobility	Casters included

Included Accessories

- Cellulose Pad
- Two Ice Boxes
