Product Overview

Efficient Evaporative Cooling

This portable evaporative air cooler utilizes the natural physical phenomenon of water evaporation to absorb heat and lower ambient temperatures. By passing air through a wet curtain, the unit not only cools the environment but also filters out dust and particles, ensuring a circulation of fresh air. Designed for versatility, it is an energy-efficient solution suitable for spaces ranging from 15 to 35 square meters.

Technical Specifications

Voltage Options	220V-240V~50Hz, 110V~60Hz
Power Consumption	140 W
Water Tank Capacity	32 L
Fan Blade Diameter	300 mm

Performance Metrics

Key Performance Metrics

9 m/s Max Wind Speed	35 m² Max Coverage Area
