

# Portable Evaporative Air Cooler with Adjustable Louvers

This portable evaporative air cooler is designed for personal or spot cooling. It features adjustable louvers to direct airflow, a water tank with a level indicator, and control knobs for adjusting fan speed and cooling intensity.

## Product Overview

### Portable Evaporative Air Cooler

This portable evaporative air cooler is designed for efficient spot cooling in small to medium-sized spaces. Featuring adjustable louvers for precise airflow direction and a generous 19L water tank, it offers a practical solution for maintaining comfort in homes or offices. The unit is equipped with castor wheels for easy mobility and intuitive controls for fan speed and cooling intensity adjustment.
