

Portable Evaporative Air Cooler with Adjustable Louvers

This evaporative air cooler is designed for personal or small space cooling. It features a water tank for evaporative cooling, a fan for air circulation, and adjustable louvers for directing airflow.

Overview

Portable Evaporative Cooling Solution

This portable evaporative air cooler is designed for efficient cooling in personal or small indoor spaces. It features advanced air purification technology, including photocatalyst vortex winnowing and anion dust bacteria removal to ensure fresh, clean air. With its user-friendly backlit LED display and convenient timer functionality, it offers both comfort and energy-efficient operation.

Key Features

Design Highlights

- Axial moving machine
- Side air mode
- Adjustable louvers
- Removable wet curtain structure
- Brake casters for mobility

Usability Features

Backlit LED Display • Timer Switch • Energy Saving • Easy to Clean

Cooling Technology

Evaporative Cooling, Photocatalyst Vortex Winnowing, Anion Air Purification
