

Portable Evaporative Air Cooler with Caster Wheels

This portable evaporative air cooler is designed for personal cooling. It features a water tank and caster wheels for mobility.

Product Overview

Versatile Cooling Solution

This portable evaporative air cooler is designed for efficient personal cooling in various environments. Featuring a durable plastic construction and integrated caster wheels, it offers exceptional mobility and long-lasting performance. The unit combines a traditional draught fan with an evaporative water tank system to provide a refreshing breeze wherever it is needed.
