

Portable Evaporative Air Cooler with Casters

This portable air cooler is designed for personal or small space cooling. It uses evaporative cooling technology and features caster wheels for easy mobility.

Overview

Efficient Portable Cooling

This portable evaporative air cooler is designed to provide effective climate control for small to medium-sized indoor spaces. Utilizing advanced evaporative cooling technology, it offers an energy-efficient alternative to traditional air conditioning systems. The unit is built for mobility, featuring integrated caster wheels and an intuitive control interface for easy operation.
