Overview

Efficient Cooling & Air Quality

This portable evaporative air cooler is designed to provide effective cooling for indoor spaces, utilizing a water tank for natural temperature depression. It features an integrated ionizer to help clean the air, ensuring a fresher environment. With multiple wind modes and a mobile design, it offers a versatile solution for personal or small room comfort.

Performance

Wind Modes

- Natural
- Normal
- Sleeping

Cooling Technology

Evaporative cooling with integrated ionizer

Design & Mobility

Control Options

- Digital control panel
- Remote control
- Top-mounted buttons

Mobility

Caster wheels, Portable, Compact design

Airflow Features

Multi-speed fan, Adjustable louvers, Oscillation function
