

Portable Evaporative Air Cooler with Remote Control

This portable evaporative air cooler provides cooling through water evaporation. It features a multi-speed fan, a water tank with a level indicator, a remote control, a digital display, adjustable louvers, and caster wheels for mobility.

Product Overview

Efficient Cooling Solution

This portable evaporative air cooler is designed to provide effective cooling for indoor environments through the natural process of water evaporation. Equipped with a multi-speed fan and adjustable louvers, it offers customizable airflow to suit various space requirements. The unit features a user-friendly digital display, remote control operation, and a water tank with a clear level indicator for easy maintenance.
