

Portable Evaporative Air Cooler with Vertical Grille

This portable air cooler is designed for personal cooling. It utilizes a water tank and vertical grille for efficient evaporative cooling and air distribution.

Product Overview

Efficient Evaporative Cooling Solution

This portable evaporative air cooler offers a versatile solution for cooling and humidifying indoor environments. Utilizing water-cooling technology, it provides an eco-friendly alternative to traditional cooling methods without the use of fluorine. Designed with a cross-flow wind system and a vertical grille, it ensures large air delivery and optimal airflow distribution for personal or professional spaces.

Key Features

Operation & Control

- Remote control operation
- 90-degree automatic oscillation
- 7-hour cumulative timer

Cooling & Air Quality

Water Pump Cooling, Humidifying, Dust Collection, Odor Neutralization

Technical Specifications

Environmental Impact

No Fluorine Pollution

Timer Duration

7 hours

Cumulative Timer

Air Delivery System

Cross flow wind way
