

Portable Evaporative Air Cooler with Wheels

This portable air cooler uses evaporation to provide cooling, consuming less energy than an air conditioner. Its compact design and four wheels allow for easy movement and space-saving storage.

Product Overview

Efficient Personal Cooling Solution

This portable evaporative air cooler is engineered for versatile personal space cooling in homes, offices, and dormitories. Its compact, slim design ensures it fits seamlessly into tight spaces while providing effective air circulation. Equipped with integrated caster wheels, the unit offers excellent mobility, allowing users to easily relocate the cooler wherever comfort is needed most.
