

Portable Evaporative Air Humidifier

The portable evaporative air humidifier provides efficient humidity control in diverse settings. Its robust design ensures effective evaporation and consistent humidity, making it suitable for commercial and industrial use.

Overview

Efficient Humidity Control

This portable evaporative air humidifier is engineered to provide reliable and precise humidity control across various commercial and industrial environments. Featuring a robust construction and optimized airflow, it ensures consistent moisture levels without the risk of over-saturation. Designed for cost-efficiency and ease of use, this unit offers a low-maintenance solution with minimal energy consumption.

Key Features

Operational Benefits

- Superb control functionality
- Minimum relative humidity fluctuation
- No risk of over saturation
- Modulating fan speed control
- Low noise level operation

Maintenance & Installation

Maintenance & Installation

- Quick and easy installation
- Easy maintenance procedures
- Pre-filter included for dust removal
- Tablet doser systems for water treatment
