

# Portable Fire Extinguisher

This portable fire extinguisher is designed for extinguishing small fires. It is suitable for various fire types and offers a reliable solution for fire safety in industrial and commercial environments.

## ADDITIONAL IMAGES

## Product Overview

### Reliable Fire Suppression

This portable fire extinguisher is designed for rapid deployment and effective fire control in industrial and commercial environments. It features a durable cylinder construction with a user-friendly activation mechanism, making it ideal for protecting vehicles, machinery, and confined spaces. Engineered for safety and long-term reliability, this device provides essential protection against potential fire hazards.

## Technical Specifications

### Key Components

- Durable red cylinder
- Brass valve assembly
- Pressure gauge
- Safety pin
- Discharge nozzle/horn

### Suitable Fire Classes

Class B, Class C

### Extinguishing Agent

Carbon Dioxide (CO2)

## Application

### Recommended Applications

Industrial • Commercial • Vehicles • Machinery • Confined Spaces
