

Portable Gas-Shielded Welding Machine with Cart

This portable welding machine is equipped with a wire feeder, control panel, and power supply. It is mounted on a wheeled cart and includes a gas cylinder for gas-shielded welding.

Product Overview

Professional Mobility in Welding

This portable gas-shielded welding machine is designed for versatility and ease of use in diverse metal fabrication and repair environments. It features an integrated multi-tiered cart system, allowing operators to move the power supply, wire feeder, and gas cylinder as a single, cohesive unit. This setup maximizes workspace efficiency and ensures that essential welding tools are always within reach for mobile operations.

Key Features

Design Highlights

- Integrated wire feeder
- Multi-tiered storage cart
- Rear gas cylinder mounting
- Heavy-duty mobility wheels
- Ergonomic handle for maneuvering

Welding Capabilities

Gas-Shielded, Portable, Mobile Cart System

Technical Specifications

System Components

Component	Function
Wire Feeder	Top-mounted for accessibility
Control Panel	Centralized operation interface
Power Supply	Base-mounted for stability
Cart	Integrated mobility and storage
