

# Portable Gasoline Generator

This gasoline generator provides reliable power for various applications. Its robust frame ensures durability and it features multiple outlets for connecting different devices.

## Overview

### Reliable Power Solution

The SS3000E is a versatile gasoline-powered generator designed to provide dependable power for both residential and commercial applications. Featuring a robust, portable frame, it ensures durability and ease of transport for use in remote locations or during power outages. Equipped with a recoil start system and a high-capacity fuel tank, this unit offers extended run times and stable power output for essential appliances and equipment.

## Technical Specifications

### Rated Power Output

**3000 Watts**

Rated Power

Fuel Type	Gasoline
Starting System	Recoil Start

## Features

### Safety & Control

- Integrated Circuit Breakers
- Operational Status Indicators
- Robust Protective Frame

Suitable Applications	Residential, Commercial, Emergency Backup, Remote Sites
