Product Overview

Compact Portable Power

This portable gasoline generator is designed for recreation, emergency, and home use. It features a lightweight, compact design for easy transportation and a reliable 2-stroke engine for efficient power generation. With user-friendly features like easy-pull starting and low fuel consumption, it provides up to 8 hours of continuous operation.

Technical Specifications

Runtime

8 hours

Continuous Running

Core Features

- Easy recoil start mechanism
- Brushless alternator
- Electronic ignition
- Overload protection
- Low fuel consumption

Engine Type	2-stroke gasoline engine
Available Power Outputs	450W, 650W, 800W

Safety & Maintenance

Safety Features

Overload Protection • Brushless Alternator • Electronic Ignition
