

Portable Gasoline Generator

This gasoline generator is impact resistant and provides reliable operation with low noise. It is an ideal movable power source for outdoor working, lighting, and various applications.

Overview

Reliable Portable Power Solution

This portable gasoline generator is designed as a flexible and reliable power source for a wide range of professional and recreational applications. Engineered for low-noise operation and high impact, it serves as an ideal solution for outdoor work sites, emergency lighting, and critical infrastructure like hospitals or communication hubs. The unit features a compact, transportable design, making it easy to deploy wherever dependable electricity is required.

Technical Specifications

Safety Features

- Overload protection

Model	SH900(DC)
Power Type	Gasoline
Output Capabilities	AC Output, DC Output
Monitoring	Integrated AC Voltmeter

Applications

Suitable Applications

Camping • Outdoor Events • Emergency Backup • Communication • Medical Facilities • Construction

Customization

Tailored Power Output

To meet specific operational requirements, this generator can be equipped with different voltage and frequency configurations upon request.
