Product Overview

Reliable Portable Power Solutions

This portable gasoline generator is engineered to provide dependable power for backup requirements or remote locations without grid access. Built with a robust frame and integrated wheels, it offers excellent mobility alongside essential safety features like circuit breakers and voltage monitoring. Featuring high-quality copper windings, it ensures efficient performance for various electrical applications.

Technical Specifications

Rated Voltage	230 V
Rated Frequency	50 Hz
Noise Level	93 dB
Motor Construction	Full copper wire

Features & Safety

Safety Mechanisms

- Circuit breaker protection
- Engine ignition switch
- Low oil warning
- Voltage monitoring

Certifications	CE, Japan Quality Standard
----------------	----------------------------

Output & Connectivity

Available Outputs

220 V

AC Output

12 V

DC Output
