

Portable Gasoline Generator

This portable gasoline generator provides electrical power in remote locations or during power outages. It features a robust frame, gasoline engine, alternator, control panel, voltage meter, circuit breakers, and outlets for connecting electrical devices.

Product Overview

Versatile Power Solution

This portable gasoline generator utilizes advanced technology and high-quality magnetic materials to ensure stable voltage output. Designed with a brushless capacitor system, it eliminates the need for routine maintenance or carbon brush replacements. Its robust construction makes it an ideal power source for families, villas, worksites, and marine applications.

Technical Performance

Maximum Output

2700 W
Max Power

Voltage Regulation

Brushless capacitor adjustment

Features

Key Features

Brushless design, Low maintenance, Stable voltage, Durable frame, Portable

Applications

Suitable Applications

- Residential/Family use
- Villas
- Construction worksites
- Ships/Marine
- Powering lights and appliances
- Refrigeration
