

Portable Gasoline Generator

This generator provides electrical power in locations without grid electricity. It uses a gasoline engine and alternator to produce AC electricity and is mounted on a protective frame for portability.

Overview

Reliable Portable Power

This portable gasoline generator is engineered to provide dependable electrical power in remote locations or during grid outages. Equipped with a robust gasoline engine and high-efficiency alternator, it delivers consistent AC electricity for essential operations. Designed for durability and ease of transport, the unit features a protective frame that safeguards critical components, making it an ideal power solution for construction sites, outdoor recreational areas, and emergency backup scenarios.

Key Features

Power Source	Gasoline
Design	Portable with protective frame
Common Applications	Construction Sites, Camping, Emergency Power, Tool Operation

Performance

Output Type	AC Electricity
