Product Overview

Reliable Portable Power Solution

This portable gasoline generator is engineered for high-performance power generation in demanding environments. Equipped with a powerful 670cc four-stroke V-type double-cylinder engine, it delivers consistent output with minimized vibration and emissions. Designed for mobility and endurance, the unit features a reinforced large-capacity fuel tank for extended operation and an omnidirectional wheel system for easy transport.

Engine Specifications

Engine Displacement	670 cc
Engine Type	Four-stroke, V-type double cylinder

Performance & Durability

Durability Testing

1000 hours

Enhanced Durability Test

Key Features	Low Vibration, Low Emission, Reinforced Fuel Tank, Electric Start
--------------	---

Design & Portability

Mobility Features

- Omnidirectional wheels
- Drag, pull, and turn functionality
- Robust frame construction

Safety & Control

Safety Features

- Separated strong and weak electricity on panel
- Muffler protective cover
- Warning labels included
