

Portable Gasoline Generator

This portable generator provides dependable power in various applications. It is ideal for construction sites, outdoor events, and emergency backup power.

Product Overview

Versatile Portable Gasoline Generators

This series of portable gasoline generators offers a range of power solutions, from compact models for light tasks to heavy-duty units for demanding applications. Each model features a reliable recoil starting system and is built for efficient operation with forced air-cooled engines. Designed for portability and consistent performance, these generators are ideal for construction sites, outdoor events, and providing dependable emergency backup power.

Technical Specifications

Model Comparison

Feature	GS-950	GS-2800	GS-5800
Engine Type	2-Stroke	4-Stroke, OHV	4-Stroke, OHV
Displacement (cm ³)	63.1	196	389
Max Power (KVA)	1	2.6	5.5
Tank Capacity (L)	4.5	15	25
Noise Level (dB @ 7m)	58	67	74
Weight (kg)	21	47	83

Performance Metrics

Key Performance Metrics

5.5 KVA

Max Power (GS-5800)

25 L

Max Fuel Capacity

58 dB

Min Noise Level

Electrical Standards

Electrical Output

220V Rated Voltage, 50Hz Frequency, AC Output, DC 12V Output
