

Portable Gasoline Generator

This portable gasoline generator provides electrical power in remote locations or during power outages. It features a robust frame, a gasoline-powered engine with a protective red shroud, and a control panel.

Overview

Reliable Portable Power Solution

This portable gasoline generator is engineered to provide dependable electrical power in remote locations or during unexpected power outages. It features a robust protective frame for durability in harsh environments and an integrated control panel for seamless operation and monitoring. With built-in voltage regulation, it offers a stable power output suitable for various professional and emergency applications.

Technical Specifications

Model Number	QD4GF-4
Rated AC Voltage	220 V
Engine Type	Gasoline

Features

Control Panel Features

- Integrated Voltmeter
- Automatic Voltage Regulator (AVR)
- Engine Power Switch
- Multiple AC Outlets

Build Characteristics	Portable, Robust Frame, Protective Shroud
