

# Portable Gasoline Generator Set

This gasoline-powered generator set delivers portable electrical power. It features a durable frame, reliable engine, and user-friendly controls for various applications.

## Overview

### Portable Power Solution

This portable gasoline-powered generator set is engineered to provide reliable electrical power in various environments. Featuring a robust protective frame for enhanced durability and portability, it is designed for demanding applications such as construction sites, outdoor events, and emergency power backup. The unit combines a dependable engine with an intuitive control interface for ease of use.

## Performance

### Key Output Metrics

**1200 W**

Rated Output

### Model Identifier

OY1200D

## Construction

### Manufacturing Origin

Japan

### Design Features

Portable, Robust Frame, Gasoline Powered

## Applications

### Ideal Applications

- Construction sites
- Outdoor events
- Emergency power backup
