

Portable Gasoline Generator Set

This gasoline-powered generating set is designed for portable power needs. It features a robust frame, easy-to-use control panel with voltage meter, and AVR for stable power output.

Overview

Portable Power Solution

This gasoline-powered generating set is engineered to provide reliable and stable power for temporary or backup needs. Featuring a robust frame design, it ensures both durability and ease of transport. The unit is equipped with an Automatic Voltage Regulator (AVR) to maintain consistent power output, making it suitable for a variety of professional and general applications.

Technical Specifications

Model Identifier	SDQF2-II
Key Features	Gasoline Powered, Portable, AVR Equipped, Voltage Meter

Design & Build

Frame Construction	Robust protective frame
Portability	Yes
