

# Portable Gasoline Generator SH3000

This generator is designed for impact resistance, flexible use, and low noise operation. It is a reliable and convenient movable power source suitable for outdoor work, lighting, and applications requiring mobile electricity.

## Overview

### Reliable Portable Power Solution

This portable gasoline generator is engineered for flexibility and reliable operation in diverse environments. It serves as an ideal mobile power source for professional applications, including outdoor work, emergency lighting, communication setups, and medical facilities. Designed with impact resistance and low-noise technology, it ensures consistent performance wherever power is needed.

## Technical Specifications

### DC Output

**12 V**

DC Voltage

**8.3 A**

DC Current

### AC Output

220V

### Key Features

AVR Technology, Voltmeter, Circuit Breaker, Portable Frame

## Applications

### Recommended Use Cases

- Movie production sites
- Electrical field work
- Educational settings
- Hospitals and clinics
- Communication infrastructure
- Outdoor lighting and construction
