

Portable Gasoline Generator with 110V/220V AC and DC Output

This portable gasoline generator is designed for providing electrical power in various applications. Equipped with a gasoline engine, it offers 110V and 220V AC power outputs at 60Hz, along with a DC output for battery charging.

Overview

Portable Power Solution

This portable gasoline generator is designed to provide reliable electrical power across a variety of applications. It features versatile output options including 110V and 220V AC, as well as a dedicated DC output for battery charging. Engineered for mobility, the unit is mounted on a durable wheeled frame, making it an ideal solution for remote power needs.

Technical Specifications

AC Output Voltage	110V, 220V
Frequency	60 Hz
DC Output	Yes

Features

Control Panel Components

- Motor Switch
- Voltmeter
- Circuit Breaker
- Fuel Valve

Portability Features

Wheeled Frame • Portable
