

Portable Gasoline Generator with 220V AC and 12V DC Output

This gasoline generator is a portable power source suitable for providing electricity in remote locations or during power outages. It features a 25L fuel tank, AC 220V outlets, and a DC 12V/8.3A output for versatile power options.

Overview

Reliable Portable Power Solution

This portable gasoline generator is designed for dependable performance in remote locations or during unexpected power outages. Featuring a robust 25L fuel tank and a powerful 13HP engine, it delivers consistent energy for extended periods. With versatile output options including 220V AC and 12V DC, it provides a flexible power solution for a variety of professional and emergency applications.

Performance Metrics

Maximum Power Output

5 KVA Maximum Power	5.5 KVA Rated Power	13 HP Engine Power
-------------------------------	-------------------------------	------------------------------

Engine Specifications

Engine Configuration

- Single Cylinder
- Four Stroke
- Forced Air-Cooled

Working Volume	389 m ³
Oil Capacity	1.1 L

Operation & Control

Fuel Tank Capacity	25 L
Continuous Working Time	11 H
Starting Methods	Hand Start, Electric Start

Electrical Output

Rated Voltage	220-240V
AC Frequency	50/60Hz
Phase Configuration	Single-Phase
