

## Portable Gasoline Generator with AVR

This gasoline generator provides a portable power solution for various applications. It features a 5.5 HP engine with AVR technology to maintain stable voltage output, along with a volt meter and circuit breaker for monitoring and protection.

### Overview

#### Professional Portable Power Solution

This series of portable gasoline generators is engineered for reliable, consistent performance in demanding environments. Featuring advanced AVR technology, the units ensure stable voltage output to protect sensitive electronic equipment. With a durable 4-stroke engine and a long-run fuel tank capacity, these generators provide a versatile power solution for various onsite needs.

### Performance Metrics

#### Key Performance Metrics

**3.3 kW**

Max Output

**16.5 h**

Max Run Time

**15 L**

Fuel Capacity

### Technical Specifications

#### Model Comparison Table

Model	Rated Output (kW)	Max Output (kW)	N.W (kg)
YL1500F	1.3	1.5	36
YL2500F	2	2.2	39
YL3500F	2.5	2.8	44

### Engine Details

Engine Configuration	Single cylinder, 4-stroke, forced air cooled
Ignition Style	Non-contact transistorized ignition

### Unit Features

Integrated Protection	AVR, Circuit Breaker, Voltmeter, Manual Start
Overall Dimensions	615 x 450 x 455 mm
