

Portable Gasoline Generator with Electric Start

This portable generator is designed for a variety of power needs. It features a durable frame with integrated handles and wheels for easy transport, along with both AC and DC outlets.

Product Overview

Robust Power Generation

This portable gasoline-powered generator is engineered to provide reliable electricity for demanding environments. Equipped with a high-capacity 28L fuel tank and a powerful 13HP 4-stroke engine, it offers sustained operation and consistent output. The unit features both electric and recoil start systems, along with integrated wheels and handles to ensure portability and ease of use in various professional settings.

Technical Specifications

Power Output Metrics

6000 W

Max Output (60Hz)

5500 W

Rated Output (60Hz)

Engine Specifications

- 13HP, Single cylinder, 4-Stroke, OHV
- Air cooled
- Unleaded gasoline fuel

Operational Details

Operational Data

Parameter	Value
Fuel Tank Capacity	28L
Noise Level (@7m)	72dB(A)
Weight	93kg
Phase	Single phase

Key Features

Electric Start, Recoil Start, Wheel & Handle Kit, Big Frame Construction
