

Portable Gasoline Inverter Generator

This portable gasoline inverter generator provides a reliable power source for various applications. It utilizes inverter technology to deliver clean and stable AC power suitable for sensitive electronics.

Product Overview

Professional Grade Portable Power

This portable gasoline inverter generator is engineered for quiet, reliable power delivery, featuring advanced inverter technology that produces clean energy ideal for sensitive electronics. With a compact 23kg design, integrated wheels, and an ergonomic pull-rod handle, it offers exceptional mobility for professional and recreational use. The unit incorporates intelligent features like a digital display, tool-less maintenance access, and unique parallel connectivity for scalable power output.

Performance Specifications

Key Performance Metrics

2300 W

Starting Wattage

1800 W

Running Wattage

63 dba

Noise Level @ 7M

3 %

THD Distortion

Physical Design

Dimensions and Weight

Metric	Value
Weight	23 kg
Portability	Wheeled with pull-rod handle

Compliance and Standards

International Certifications	EPA, CARB, CE, c-ETL, PSE

Features

Standard Features

- Digital display for operational monitoring
- Tool-less rear maintenance access for oil and air filter
- Parallel operation capable
- Variable frequency and voltage stabilization
- Low-oil shutdown protection
- Fuel efficient operation
