

Portable Gasoline Inverter Generator

This gasoline inverter generator is designed to provide a portable power solution. The compact and lightweight design ensures easy transport and storage.

Overview

Portable Power Solution

This gasoline-powered inverter generator is designed for versatility, serving as an ideal power source for camping, tailgating, and emergency backup needs. Featuring advanced inverter technology, it delivers clean, stable pure sine wave AC output suitable for sensitive electronic devices like laptops and smartphones. Its compact, lightweight design and ergonomic handle ensure high mobility, while the closed capsule construction and damping materials maintain an exceedingly quiet operation.

Technical Specifications

Key Performance Metrics

2 kW Rated Power	2.2 kW Max Power	8.7 A Rated Current	5500 r/min Rated Speed
----------------------------	----------------------------	-------------------------------	----------------------------------

Electrical Data

Parameter	Value
Rated Voltage	230V
Rated Frequency	50Hz
DC Output	12V / 5A

Operating Environment

- Max Ambient Temperature: 40°C
- Min Ambient Temperature: -15°C
- Max Altitude: 1000m
- Protection Degree: IP23M
- Insulation Class: F

Features & Safety

Safety Systems

Oil Deficiency Indicator • Automatic Shut-off • Overload Protection

Core Features

Eco-mode, Pure Sine Wave, Recoil Starter, Fuel Level Indicator, Compact Design
