

Portable Gasoline Water Pump

This is a portable gasoline water pump designed for drainage and irrigation. It features a robust engine for reliable performance and a durable pump housing for an extended lifespan.

Overview

High-Performance Portable Water Pump

This portable gasoline water pump is engineered for demanding drainage and irrigation tasks in agricultural and construction environments. Built with a robust engine, it ensures reliable, long-term performance even in challenging conditions. The durable pump housing is designed to withstand heavy-duty usage, making it an essential tool for efficient water transfer operations.

Key Features

Performance Highlights

1 Gasoline
Engine Type

1 Portable
Design

Suitable Applications

Agricultural Irrigation, Construction Site Drainage, Water Transfer

Technical Specifications

Construction Details

- Robust engine for reliable power
- Durable pump housing for extended lifespan
- Portable design for easy transport
