Product Overview

Compact Power for Irrigation and Drainage

This portable gasoline water pump is a high-performance solution designed for efficient water transfer in agricultural and general drainage applications. Featuring a 2-stroke engine with an Italy-inspired professional design, it combines reliability with ease of use. Its lightweight construction ensures it is simple to transport and set up wherever needed.

Technical Specifications

Power Output

1.25 kW
Power (kW)

1.7 hp
Power (hp)

Engine Displacement	43 cc
Net Weight	9.5 kg
Engine Series	2-stroke
Model	QGZ40-35Y

Features

Key Design Highlights

- Portable and lightweight design
- Durable pump housing
- Easy-to-start engine mechanism
- Protective orange cage
- Stable base mount

Suitable Applications	Drainage, Irrigation, Agricultural Water Transfer
