

Portable Gasoline Water Pump for Irrigation

This portable water pump is designed for agricultural and engineering applications. It is designed for efficient water transfer in irrigation, drainage, and other fluid handling tasks.

Overview

Portable Gasoline Water Pump

This portable gasoline-powered water pump is engineered for versatile use in agricultural and engineering environments. Featuring a robust metallic housing and a protective engine cover, it is built to withstand demanding field conditions. The unit is mounted on a stable frame, ensuring reliability during irrigation, drainage, and fluid transfer operations.

Technical Specifications

Power Source	Gasoline
Primary Applications	Irrigation, Drainage, Engineering, Agriculture

Design & Construction

Housing Material	Metallic
Frame Design	Sturdy protective frame
Portability Features	Yes
