

Portable Gasoline Water Pump for Irrigation and Construction

This portable water pump is designed for various water transfer applications. It features a gasoline-powered engine for reliable operation and is constructed with a durable frame for protection and easy transport.

Overview

Versatile Water Transfer Solution

This portable gasoline water pump is engineered for demanding tasks in irrigation, construction, and emergency water management. Its independent, fuel-powered engine ensures reliable performance in remote locations where electricity is unavailable. The robust frame design offers both structural protection and simplified portability for field operations.

Technical Specifications

Engine Type	Gasoline
Common Applications	Irrigation, Construction, Water Transfer, Emergency Drainage

Features

Portability	Yes
Construction	Durable reinforced frame for impact protection and transport
