

Portable Gasoline Water Pump for Irrigation and Construction

This gasoline water pump is a portable and powerful tool designed for efficient water transfer. Featuring a robust gasoline engine, it delivers high-volume pumping for irrigation, construction, and emergency situations.

Overview

High-Performance Portable Water Pump

This portable gasoline water pump is engineered for demanding tasks in irrigation and construction environments. Powered by a reliable 7.0HP engine, it delivers a high-volume output of 1000L/min, making it suitable for rapid water transfer and emergency drainage. Its robust, compact design ensures durability in harsh conditions while remaining easy to transport across job sites.

Performance Metrics

Maximum Flow Rate

1000 L/min
Max Flow

Maximum Head Lift	32 m
Maximum Suction Head	8 m

Engine Specifications

Engine Power	7 HP
Engine Displacement	208 cc
Fuel Tank Capacity	3.6 L
Starting System	Recoil

Physical Dimensions

Suction & Discharge Port	80mm (3 inches)
--------------------------	-----------------

Applications

Recommended Use Cases	Irrigation, Construction, Emergency Drainage, Water Transfer
-----------------------	--
