Product Overview

High-Efficiency Portable Gasoline Water Pump

This portable gasoline-powered water pump is designed for reliable performance in irrigation, cleaning, and fire fighting applications. Featuring a high-performance 2-stroke engine and a durable aluminum impeller and pump housing, it offers an excellent balance of power and portability. The unit is engineered for easy transportation and storage, making it an ideal choice for agricultural and construction tasks that require efficient water movement.

Technical Specifications

Performance Metrics

35 m Maximum Lift	8 m Maximum Suction	7000 rpm Engine Speed
-----------------------------	-------------------------------	---------------------------------

Model Specifications

Feature	QGZ25-30	QGZ40-35
Inlet/Outlet	1"	1.5"
Flow Rate	8 m ³ /h	15 m ³ /h
Net Weight	7.5 kg	8.5 kg

Engine & Capacity

- Engine Type: Single cylinder, air-cooled, 2-stroke
- Power: 1.45 kW
- Displacement: 40.2cc
- Fuel Tank Capacity: 0.9L

Construction Materials

Aluminum Impeller, Aluminum Pump Housing, Metal Frame

Commercial Terms

Purchase Conditions

- Warranty: 3 years
- Payment: 30% T/T deposit, 70% against B/L copy, or Irrevocable L/C at sight
- Delivery: Within 35 days
- Logistics: Nearest port is Qingdao Port
