

Portable Gasoline Water Pump for Irrigation and Drainage

This portable water pump is designed for irrigation, drainage, and general water transfer. It features a robust frame for protection and easy transport.

Product Overview

Professional Portable Water Pump

This portable gasoline-powered water pump is engineered for efficient irrigation, drainage, and general water transfer operations. Its centrifugal pump design ensures high-volume water movement, making it ideal for agricultural and industrial tasks. Featuring a robust protective frame, this unit is built for durability and easy transport in demanding environments.

Technical Specifications

Engine Power

6.5 HP

Rated Power

Fuel Type	Gasoline
Pump Type	Centrifugal

Features

Key Features

- Robust protective metal frame
- Portable compact design
- Easy transport handle structure
- High-volume centrifugal output

Primary Applications	Irrigation, Drainage, Water Transfer
