## Product Overview

### Portable Gasoline Water Transfer Pump

This portable and self-priming gasoline water pump is engineered for efficient water transfer across a variety of professional applications. Featuring a robust engine, it delivers reliable power and high pumping capacity to handle demanding environments. Built with durable materials, this unit is an ideal solution for irrigation, construction sites, and emergency water management tasks.

## Technical Specifications

### Performance Metrics

**2.6 kW**

Max Power

**4000 rpm**

Max Power Speed

**2 kW**

Rated Power

### Engine Model Specifications

Model Identifier	Serial Reference
EY15D	F326548
EY20D	CR03675

## Usage & Applications

### Key Design Features

- Portable design for easy transport
- Self-priming capability
- Robust engine construction
- Durable frame for stability and protection

### Suitable Applications

Irrigation, Construction Sites, Emergency Water Removal
