

Portable Gasoline/Diesel Inverter Generator

This portable gasoline/diesel inverter generator provides access to a reliable electricity supply. It reduces energy consumption and saves on operation and maintenance costs.

Product Overview

Versatile Power Solutions

These portable gasoline and diesel generators are engineered to provide reliable electricity for both residential and professional applications. Designed with high power output and compact portability in mind, these units ensure consistent energy supply while optimizing fuel consumption. Whether for emergency backup, sensitive electronics, or demanding worksites, this range offers flexible fuel options and robust performance to meet diverse power requirements.

Performance Metrics

Power Output

3300 W
Max Output

3000 W
Rated Output

Technical Features

Compatible Fuels

- Gasoline
- Diesel

Engine Technologies

Inverter Technology, Direct Injection, Dual Fuel Capability

Portability & Design

Design Highlights

- Integrated wheels for mobility
- Compact frame construction
- Durable exterior housing

Safety & Control

Control Panel Features

- Digital performance display
- Analog voltmeter
- Multiple power outlets
- Integrated circuit breakers

Safety Systems

- Overload protection
- Low oil shutdown
