

Portable High-Velocity Air Circulator Fan

This draught fan is designed for efficient air circulation and cooling in various environments. Its portable design, complete with caster wheels, allows for easy relocation.

Overview

High-Performance Air Circulation

This portable high-velocity air circulator fan is engineered for efficient cooling and ventilation across a variety of professional environments. Featuring a robust housing and high-performance motor, it delivers optimal airflow for both indoor and outdoor applications. Its user-friendly design includes an integrated control panel and caster wheels for effortless relocation and precise environmental management.

Performance Highlights

1 Unit

High-Performance Motor

Design & Construction

Construction Details

- Robust durable housing
- High-performance fan motor
- Integrated caster wheels for mobility
- User-friendly control panel

Safety & Usage

Environment Suitability	Indoor Use, Outdoor Use, Industrial, Commercial
Safety Compliance	Yes

Mobility

Portability

Caster Wheels • Portable Design

Control System

Speed Control	Adjustable fan speed via integrated control panel
