

Portable Ice Maker

This portable ice maker is a compact appliance for producing ice quickly. It features a water reservoir, ice basket, and control panel, and is equipped with sensors for full ice basket and low water level detection.

Product Overview

Compact Ice Making Solution

This portable ice maker is designed for high efficiency in compact spaces, making it an ideal choice for offices, homes, or recreational settings. It utilizes an advanced refrigeration system that pumps water over metal fingers to create high-quality ice cubes. Equipped with smart sensors, the unit provides automated operation by monitoring water levels and ice capacity to ensure safety and convenience.

Technical Specifications

Key Features

- Adjustable ice cube sizes
- Automatic shut-off for full basket
- Low-water detection sensor
- Integrated control panel

Safety Compliance

Overflow protection • Automatic stop

Operation Type

Automated refrigeration cycle

Suitable Applications

Home, Office, Recreational
