

# Portable Industrial Polishing Machine

This portable industrial polishing machine is designed for versatile applications. It features a handheld control unit with adjustable speed settings and a flexible shaft for maneuverability.

## Overview

### High-Precision Industrial Polishing

The JD5G is a professional-grade, portable industrial polishing and grinding machine engineered for high-precision tasks. Designed with versatility in mind, it features a handheld control unit with dual-knob speed adjustments and a digital display for real-time monitoring. The inclusion of a flexible shaft allows for exceptional maneuverability in tight or hard-to-reach spaces, making it an essential tool for demanding industrial environments.

## Technical Specifications

Device Type	Vacuum Grinding Machine
Key Features	Portable, High-Precision, Adjustable Speed, Digital Display, Flexible Shaft

## Design & Ergonomics

### Ergonomics

- Handle for comfortable operation
- Clip for convenient tool storage
- Durable housing for industrial reliability

### Control Interface

Dual Knob Adjustment • Digital Monitoring
