

# Portable Industrial Space Heater

This portable industrial space heater is designed to provide supplemental heat in various environments. It features adjustable temperature and fan speed controls, housed in a durable black and green casing with a chrome handle for easy transport.

## Overview

### High-Efficiency Industrial Heating

This portable industrial space heater is designed for demanding environments such as workshops, garages, and construction sites. Featuring a robust housing and integrated handle, it offers reliable supplemental heating with adjustable temperature and fan speed settings. Its durable construction ensures longevity and consistent performance in professional settings.

## Technical Specifications

### Heating Capacity

**3000 W**

Max Power Output

### Adjustable Modes

- Fan Only
- Low Heat
- High Heat

### Control Interface

Dual rotary knobs for temperature and fan speed adjustment

## Design & Build

### Safety Compliance

Overheat Protection • Thermal Cut-off

### Portability

Chrome Handle, Lightweight, Industrial Grade
