

Portable Infrared Oil-Fired Heater

This portable infrared oil-fired heater provides efficient and directional heating. It is equipped with a robust frame on wheels for easy movement, a fuel tank for long operation, and a safety grill.

Product Overview

Efficient Heating Solution

This portable infrared oil-fired heater is engineered for efficient and directional heating in demanding environments. Designed for mobility, the unit features a robust frame with integrated wheels, ensuring easy maneuverability across industrial or commercial workspaces. It provides instant, radiant heat and includes a built-in fuel tank for extended operation.

Performance

Heat Output

40 kW

Heating Power

Design & Features

Key Features

- Portable design with wheels
- Integrated fuel tank
- Protective safety grill
- Radiant heating technology

Suitable Applications

Industrial, Commercial
