Product Overview

Efficient Targeted Heating

This portable infrared quartz electric heater combines fan-forced air circulation with infrared heating technology to provide rapid, directional warmth. Designed for industrial and commercial environments, the unit is engineered for reliability in demanding spaces like workshops and warehouses. It operates cleanly without fumes, smells, or oxygen consumption, making it a safe and practical solution for supplemental or spot heating.

Key Features

Operational Benefits

- No fumes or smells
- Low or no noise operation
- No oxygen consumption
- Instant heating response
- Fan-assisted air circulation

Design Highlights

Portable, Industrial Grade, Directional Heating, Protective Grill, Adjustable Thermostat

Technical Specifications

Power Output

15 kW

Max Power

Safety Features

- Protective metal grill
- Thermal overload protection
- Stable base construction

Mobility and Handling

Mobility

- Integrated carry handle
- Robust frame
- Casters for easy movement
