Overview

Compact Power Solution

This portable inverter generator sets a new standard for efficiency and portability in the industry. Designed with a professional air duct system for superior heat dissipation, it ensures stable and reliable performance for sensitive electronics. Its compact, lightweight construction and rain-proof, oil-proof design make it an ideal choice for professional and recreational power needs.

Performance

Rated Output

1.6 kW

Rated Power

Engine Type

Four-stroke

Technology

AC-DC-AC Inverter

Technical Specifications

AC Output Voltage

230 V

DC Output

12V 8.3A

Safety & Control

Low-oil shutdown, Overload indicator, Output indicator, Idle Speed Control (ISC), AC Reset button, DC Breaker

Design & Build

Design Highlights

- Lightweight and portable
- Professional air duct design
- Symmetric flywheel and magneto arrangement
- Rain-proof and oil-proof casing
- One-sided maintenance access
